Impact Statements

Resolution:

Private equity and quality of long-term care
and jobs

Legal Impact

The Union uses economic information available for companies in the nursing home and home healthcare settings to advocate and bargain for workers. Increased transparency will help the Union to advocate on behalf of workers and residents in care settings.

Equity & Inclusion Impact

This resolution has a positive equity impact. The resolution seeks to increase transparency and accountability around the investment of public funds in private equity firms involved in long-term care facilities. The resolution also commits our union to support investment in higher wages and improved working conditions for workers in these facilities, a larger percentage of whom are women and people of color than in many other workforces in Oregon.

Financial Impact

This is work that will be taken on with our current research staff team and will not have a budget impact.

Political Impact

Transparency in long term care is critical to advancing our Union's priorities to increase standards and improve working conditions across the industry. By collecting more information about privately owned facilities, we can better advocate for policies and hold the industry accountable.
